ANG Schweiz AG & Rinco Ultrasonics Group

"With SAP Business One around the world"

A woman with dark hair tied back, wearing a grey jacket and yellow gloves, is looking at a tablet computer. The tablet displays a white line graph with a green shaded area underneath. The background shows a factory environment with various tools and equipment on a workbench.

Project Goal

- Roll out SAP Business One across all subsidiaries within two years
- Harmonize and standardize processes throughout the entire group
- Launch a global transformation journey together with Serge Patamia
- “A journey around the world”

Key Takeaways

1. Rinco Ultrasonics AG successfully implemented:
 - SAP Business One as ERP solution
 - BEAS for production management
 - ELO as document management system (DMS)
2. These three pillars create a strong and future-oriented digital foundation
3. Standardized processes across the international group
4. Scalable platform to support continued global growth and innovation
5. Ready for future expansion in multiple directions
